

**NOTICE: Outdoor Watering Restrictions – Village of Beachburg
Whitewater Region, Ontario – April 27, 2026**

The Beachburg Water Treatment Plant (WTP) is entering the final phase of the Renewal and Optimization Project which involves undertaking repairs to the WTP clearwells. To ensure that a reliable water service is available for essential household uses, the **Township of Whitewater Region will be enacting full outdoor watering restrictions within the Village of Beachburg, effective 4:00pm April 27, 2026.** The outdoor watering restrictions will apply to all users of the Beachburg Municipal Water system.

The outdoor watering restrictions are expected to remain in place until **May 31, 2026.**

Exemptions while the restrictions are in place

- Hand watering of gardens is permitted during the ban.

Prohibited water uses include (but are not limited to)

- Lawn and turf watering
- Washing vehicles
- Filling pools or decorative water features
- Any non-essential outdoor water use

Reason for the restrictions

The Renewal and Optimization Project involves undertaking necessary repairs within the water treatment plant clearwells (holding tanks). These repairs will require portions of the clearwell system to be taken off-line while repair work is completed. As a result, the water storage capacity of the treatment plant will be temporarily reduced.

Although the reduced storage capacity will continue to provide sufficient water for **normal and essential household uses**, it will not be adequate to accommodate the increased water demand that typically occurs during warmer weather, particularly from activities such as **lawn watering and outdoor car washing.**

The Township appreciates residents' cooperation as these important improvements are completed. Temporary water conservation measures are necessary to ensure reliable water service for all users during this critical phase of construction.

Further updates will be provided as the project progresses, with the outdoor watering restrictions will be lifted as soon as the project allows.

Thank you for your understanding and cooperation.

Environmental Services Superintendent
