

COBDEN

WATER TOWER REPAIRS UNDERWAY

For Immediate Release

Cobden Water Tower Repairs (October 7, 2026)

At approximately 10:00 a.m. this morning, a pipe break was detected inside the Village of Cobden Water Tower. The Ontario Clean Water Agency (OCWA) is currently responding to the issue.

OCWA will be isolating the water tower from the distribution system this afternoon and draining the tower this evening, with repairs scheduled to take place tomorrow.

No interruption to drinking water service is anticipated at this time. Drinking water remains available to all users; however, residents may notice fluctuations in water pressure while the tower is out of service.

Once repairs are complete and the water tower is refilled, some users may temporarily experience water discolouration. Localized watermain flushing may also be required.

Further updates will be provided once repairs are complete and the water tower has been returned to service.

Thank you for your patience and understanding.
